NORTHWEST DOOR®
Northwest Door, Inc - 19000 Canyon Road East - Puyallup, WA 98375-9746

-Since 1946-

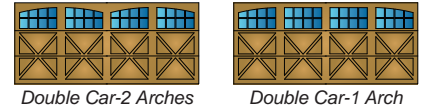

© 2015 Northwest Door, Inc.

Single car doors are 2 panels wide,
double car doors 4 panels wide,
7' high door = 3-section,
8' high = 4-section,
standard window section height = 28"

Construction:

The Township Collection is constructed with a 1-3/8" finger-jointed Hem/Fir wood frame using Mortise & Tenon Joints. Wood panels are 1/4" exterior Luan Plywood; windows glazed with 1/8" clear single pane DSB annealed glass. Doors are available up to 18' wide and 12' high; doors 12' to 18' wide have the interior side of the bottom section flushed with 1/4" Luan Plywood for additional strength. Designs with arched windows are 15'-0" radius standard, one arch on single car doors and two arches on double car doors. You may also select 58'-0" radius arch on double car doors. Doors are equipped with standard lift 15" radius torsion spring hardware; heavy gauge galvanized hinges and nylon rollers, manual push-up.

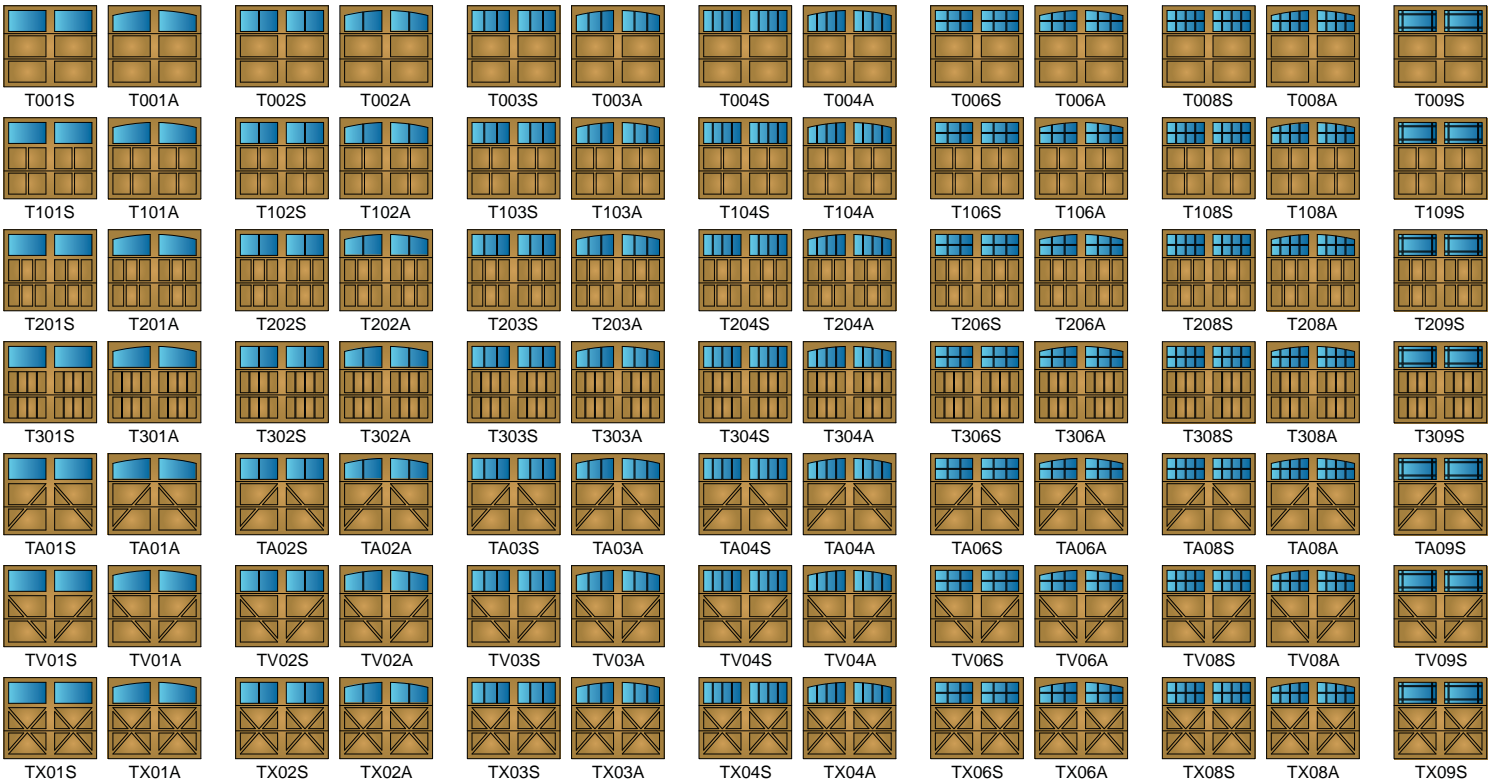

- Options:**
- (1) Solid Rail Frame, *non finger-jointed, suitable for staining*
 - (2) Exterior Glued 3/8" Breckenridge Plywood, rough textured, *paintable only*
 - (3) Flush interior of bottom section with 1/4" Luan Plywood
 - (4) Flush back of door and insulate with polystyrene insulation
 - (5) Many single pane glass styles and colors, annealed and tempered
 - (6) Custom Arched Windows, *template must be provided by buyer*
 - (7) Cedar or Hem/Fir Raised Panels
 - (8) Non Standard Widths and Heights

- (9) Prime Painting
- (10) Low Headroom and High Lift Torsion Hardware
- (11) Powder Coated Operational Hardware
- (12) Decorative Hardware, *see at www.northwestdoor.com*
- (13) Garage Door Openers, *by LiftMaster®*

LiftMaster For ease of operation we recommend the LiftMaster Professional Line Garage Door openers for all Northwest Door products.

Designs

Note: All doors come standard paint grade, face of door is sanded and requires field finish sanding prior to application of door finish. At no time should a wood door get wet prior to applying finish and must be finished prior to installation. All surfaces and edges must be finished to validate NWD Wood Door Warranty. See warranty for proper painting and finishing instructions. As a natural characteristic of wood, components of this product will not match in color or grain pattern, to achieve desired results special staining technics are required when applying finish.
